

Minutes for the Village of Cerro Gordo

September 29, 2008

Information Meeting for Storm Water Drainage

An information meeting was held on Sept. 29, 2008 at the Village Hall at 6:30 pm. This meeting was held on an informal basis for input from residents in regards to the storm water drainage study,

The meeting was called to order by David Happ, the Village engineer, along with Tom Overmyer, Project Director, and Greg Kacvinsky, Senior Project Manager with the company of Foth Infrastructure and Environment, LLC.

Those in attendance included President Jim Morgan, Trustees Brad Williams, Lyle Shoraga, Ron Price, and Terry Lovekamp, and Cris Perry.

Dave explained to residents that this meeting was called to listen to the communities input and to mark the provided maps with drainage concerns. The company wants to incorporate these concerns into the study of the drainage system. They would also like to update the old storm sewer maps. The company would like to get a model to figure out how to fix the drainage, and to prioritize the major problems. A report to summarize the study will be given to the Board for review. The primary problems would be those that have water standing for at least four days.

Dave invited individuals to the table as they marked maps and left any photos they may have of their properties. The community had a chance to meet with the Foth Company as well as the Board members to voice their concerns.

The meeting adjourned at 7:45 pm by Mayor Morgan.
